TRANSFORM INVENTORY MANAGEMENT WITH RAS RFID[®]

Scalable technology and experience for a tangible impact to your bottom line...

RAS RFID provides a greater visibility of the supply chain and ensures optimum stock levels are in the right place at the right time, ready for your customers.

Our solution combines cutting edge technology with plug and play simplicity to provide real-time data; as well as the resource to back mobilisation and ongoing RFID auditing and support.

Our service combines all the components connected with an RFID deployment; including, software, hardware, tags and human resource, all of which can be delivered individually or as part of an end-to-end solution, integrated and customised to meet your unique needs, objectives and growth plans.

THE RFID PRINCIPLE

- 01** To combine and manage all elements of an RFID solution.
- 02** To provide full visibility of stock from source through to store.
- 03** To ensure optimum stock levels are in the right place at the right time.

THE RFID PROVISION

- A complete solution combining all components connected with a deployment including software, tags, scanners and readers.
- Bespoke development for every deployment.
- E-learning and training.
- Tag-up parties.
- 24 hour technical support.
- Real-time BI analytics and dashboards.
- Hybrid counting (barcode + RFID)

A RAS RFID in-bound process provides significant benefits:

Increased sales by 1.5% - 8.0%.

98% + **accuracy** sustained.

Reduced in shrinkage of up to 15%.

20% **lower** stock-holding.

Reduced web rejections by 10%.

95% **faster** and 75% **cheaper** than barcode counts.

Reduced out of stocks of between 25-50%.

“
 With the RAS collaborative approach, we have not only achieved all our initial objectives, but have also found many other benefits of the deployment...
 ”

Chris Everest
 WED2B

Complete supply chain visibility and intelligent data; **delivered.**
