STORE RELOCATION & CLOSURE SUPPORT

TOTAL CONFIDENCE WITH RAS STORE RELOCATIONS & CLOSURES

Retail store closures can be complex and require sensitive management...

In our ever-changing industry, retailers are undergoing continuous reviews on their performance of their estate.

Whether there is a need to re-locate due to store size, lease terms or an owned-estate building program; or a more unfortunate permanent store closure, there is an enormous amount of project planning required to ensure the effective re-allocation of assets and stock.

Our Store Support Team are experienced in handling varied product types from heavy DIY items to frozen foods and will provide the expertise to successfully de-merchandise your stock in a controlled, logical & efficient way with the highest possible stock transfer accuracies whilst keeping shrinkage to a minimum.

ras | STORE SUPPORT & MERCHANDISING

We will provide you with the experience and expertise to successfully implement store closures, relocations and upgrades. By adopting a professional approach, you protect your reputation whilst using a tried and tested process to decrease shrinkage, freeing up capital to reinvigorate back into the remaining store portfolio.

THE STORE CLOSURE PROVISION

WE CAN

- Provide resource that is experienced in handling varied product types from heavy DIY items to frozen foods.
- Create uplifts using HHT's.
- Support internal admin procedures.
- Efficiently decant all transferred stock.
- Create logical transfer numbers.
- Safely wrap and label all types of stock.
- Replenish stock at destination location.
- Audit a minimum 20% sample for assurance.

POST CLOSURE

- Prioritise short life stock e.g. fresh foods limiting shrinkage.
- Clearly label bays with receiving store information.
- Label marshalling area for receiving stores.
- Ensure aisles and store left clear recycling all packaging to clients procedures.

AUDIT COMPLIANCE

- Select random transfers for audit.
- Verify store stock management system (SSMS) against audit report.
- Record variances and amend on SSMS.
- Detected errors relayed to transfer team leader to allow for continuous improvement.
- Log and dispatch all transfers on SSMS once loaded on vehicle.
- Comply with clients health and safety processes at all times.

CLOSURE DAY

- Start transfers in warehouse to minimise sales impact.
- Create marshalling area to segregate stock by transfers and final destination.
- Support store leading to final days trading to keep stock presentation standards high.
- Maintain product alignment for efficient transfer.
