

RAS START

Software as a Service

Inventory management has never been more efficient than with the RAS Start™ Inventory Intelligence platform. With a simple and intuitive interface it makes it easy to quickly and accurately manage and count stock. The platform also provides detailed analytics and reporting to help businesses make informed decisions about their inventory.

About RAS

Retail & Asset Solutions (RAS) are retail service specialists dedicated to providing comprehensive technological solutions tailored for the retail, wholesale, and DIY industries. Our team will support you right from the beginning in helping you to build the right solution for your business.

Overview

RAS Start™ offers retailers a scalable verification solution to maintain optimal stock levels, reduce shrink, increase sales, and ensure the right products are in the right stores at the right time.

Using our Android applications, RAS Start™ manages front-line tasks using a powerful cloud-based platform.

With its seamless integration with the most popular accounting and enterprise resource planning (ERP) software, inventory processes are simplified and efficiency is increased.

The user-friendly interface is a powerful tool that drives productivity right through your store operations and as a scalable solution every element can be tailored to suit your needs.

Key Features

- ✓ A structured auditing process, for flexibility to schedule stock takes wherever you need them.
- ✓ Utilise your existing hardware with manufacturer agnostic software.
- ✓ Built for Android, to provide a modern, dynamic and flexible user interface.
- ✓ Simplify costs by subscribing with a monthly fee and unlock unlimited use.
- ✓ Standardised reports with bespoke reporting options for even the most complex requirements.

Barcode

- Android based barcode scanning with OCR capabilities
- Unique identifiers for traceability
- Utilises client product file and rules for barcode validation
- Responsive to catchweight and sequentially numbered barcodes
- Manages 1D and 2D (typically QR) barcodes plus more
- Compatible with most Android Mobile Computing devices

RFID

- Android based RFID data capture enabling 'hybrid stock takes'
- Unique identifiers for traceability
- Capacity to create main and accuracy check count profiles
- Seamlessly integrates with barcode data in the Start platform
- Compatible with most Android Mobile Computing devices
- Compatible with the latest Denso and Zebra RFID sleds

Receipting

- Android based barcode receipting
- Manages 1D and 2D (typically QR) barcodes plus more
- Ability to record deliveries, returns and transfers by barcode
- Integrates directly with most internal systems
- Additional modules for product image recognition, delivery note image capture and AI/ML processing, digital signatures and label printing

Our Partners

Looking for hardware too? As registered resellers we can supply both scan and print solutions from the following:
