## TRANSFORM INVENTORY MANAGEMENT WITH RAS RFID

**Scalable technology and experience for a tangible impact to your bottom line...**

RAS RFID provides a greater visibility of the supply chain and ensures optimum stock levels are in the right place at the right time, ready for your customers.

Our solution combines cutting edge technology with plug and play simplicity to provide real-time data; as well as the resource to back mobilisation and ongoing RFID auditing and support.

Our service combines all the components connected with an RFID deployment; including, software, hardware, tags and human resource, all of which can be delivered individually or as part of an end-to-end solution, integrated and customised to meet your unique needs, objectives and growth plans.

### PLUG & PLAY TECHNOLOGY

### WHOLE SOLUTION MANAGEMENT

### BESPOKE PROCESS DESIGN

## THE RFID PRINCIPLE

**01** To combine and manage all elements of an RFID solution.

**02** To provide full visibility of stock from source through to store.

**03** To ensure optimum stock levels are in the right place at the right time.

**FACTORY**
- Shipment validation
- Inventory count
- Commissioning
- Source tagging

**WAREHOUSE**
- Shipment validation
- Inventory count
- Search

**TRANSPORTATION**
- Shipment validation

**STORE**
- Shipment validation
- RFID POS detacher
- Smart Fitting room
- Digital signage
- Self check out
- Inventory count
- Real-time replenishment
- Item Search

ras RFID SOLUTIONS

## THE RFID PROVISION

- A complete solution combining all components connected with a deployment including software, tags, scanners and readers.

- Bespoke development for every deployment.

- E-learning and training.

- Tag-up parties.

- 24 hour techical support.

- Real-time BI analytics and dashboards.

- Hybrid counting (barcode + RFID)

> With the RAS collaborative approach, we have not only achieved all our initial objectives, but have also found many other benefits of the deployment...
>
> Chris Everest
> **WED2B**

## A RAS RFID in-bound process provides significant benefits:

**Increased** sales by 1.5% - 8.0%.

98% + **accuracy** sustained.

**Reduced** in shrinkage of up to 15%.

20% **lower** stock-holding.

**Reduced** web rejections by 10%.

95% **faster** and 75% **cheaper** than barcode counts.

**Reduced** out of stocks of between 25-50%.

## Complete supply chain visibility and intelligent data; delivered.
